synapse
Connect to Grow...

True.

True to its name Synapse gives you timely services that help you reach your goal efficiently.

We at synapse understand the importance of speed, quality and reliability hence we have invested heavily for security of data, and we work round the clock on advanced instruments for guaranteed, fast and quality results.

- In today's capital intensive & highly competitive market one need to have a partner who can understand & deliver the client needs at a speed of an electrical impulse without any loss of information like our nervous system.
- In our nervous system no neurons run directly from the periphery to the brain and need help of intermediate neural cells interconnection called "SYNAPSE". Synapse has a special role to transfer electric activity(information) from one neuron to another and helps in information processing.

- In a same way at "Synapse Labs" we sense your eagerness and need for drug development and deliver results at a speed of electrical impulse in a most efficient way without compromising quality at a comparative cost.

All it comes together via interconnected network of dedicate team focused on managing your projects.

"Synapse lab" is based in PUNE a growing IT and Biotech centre of India. Very near to Mumbai, Asia's fastest growing city, with world class infrastructure with two independent clinical units with separate phlebotomy, dining, recreation and investigation area.

Clinical Research

Services offered by us includes

- Bioavailability / Bioequivalence Studies
- Phase II-IV Clinical Studies
- Clinical Data Management
- Biometrics & Report Writing

••• **Bioavailability/Bioequivalence Studies**

We have expertise in conducting following type of BA/BE Studies

- Fasting Studies
- Food Effect Studies
- Drug-Drug Interaction Studies
- Multiple Dose and Steady State Studies
- Dose Linearity Studies

••• **Clinical Data Management**

For consistent, accurate, reliable clinical trial output as per regulatory requirements, our competent team performs following functions

- Setting Clinical Data Management Process
- Clinical Data Processing
- Medical Coding
- Quality Control

••• **Phase II-IV Clinical Studies**

Our experienced project management team can support you in your clinical development program

- Regulatory Consulting
- Investigator Site Selection/ Site Feasibility Studies
- Clinical Trial Operations
- Clinical Trial Supplies Management
- Site Management

••• Biometrics

Experienced medical writers & statisticians are involved in each part of study to device study design, generate accurate & compliant study reports.

- Preparation of Statistical Analysis Plan
- Randomization & Sample size calculation
- SAS Programming & Statistical Analysis
- Report writing as per Regulatory Requirement

••• Synapse – Junction for your Clinical need

Synapse support its customers with basket of services under one roof ranging from various types of clinical studies for dossier Submission for Generics as well as NCE products to USFDA, MHRA, MCC, WHO or applicable regulatory agencies.

“Connect to Grow”

Bring accuracy, speed & success together
